## PROJECT SUMMARY

Clinica Sierra Vista is a multi-disciplinary comprehensive healthcare organization that serves the primary medical, dental and behavioral health needs of patients in Kern, Fresno and Inyo counties. Continued support provided by federal, state and local governments has allowed Clinica Sierra Vista to reach out to thousands of new patients that otherwise didn't have access to many of these services. The organization offers comprehensive programs that are tailored to specific community needs and utilizes a multi-dimensional approach to healthcare.

## PROJECT PROFILE

CORE Business Interiors was awarded a contract to specify interior finishes and provide furniture for several Clinica Sierra Vista locations, including the South Elm Women's and Pediatric Community Center, the South Elm Community Health Center and the Greenfield Community Health Center. CORE assisted the organization in providing patients with a comfortable, inviting atmosphere with a high level of durability, as was required for a community clinic environment.
