PROJECT SUMMARY

Manco Abbott is a full-service real estate management firm serving Central California. The company provides property management for retail, office, industrial and residential properties.

PROJECT PROFILE

CORE Business Interiors provided Manco Abbott with a full-service space that included modular interior construction, furniture, audio/visual solutions, and incorporation of existing modular furniture pieces. The organization came away with a fully modular environment that allows for reconfiguration of space as needed to accommodate technological and demographic changes. Project modularity was considered a significant cost savings factor as it allows for accelerated depreciation and reconfiguration to occur without the inconvenience and expenditures of conventional construction.
