## PROJECT SUMMARY

Winning the *Beautiful Bakersfield* Award in Architecture, Granite Corporation's new Bakersfield Branch Office boasts a number of sustainability design features that aid in functionality, comfort, efficiency and health of its staff.

Reclaiming and repurposing existing Granite Construction property, the new 25,000+ square foot Bakersfield branch office was designed and built by Klassen Corporation utilizing a number of sustainable design features. The final structure is considered a showcase property as it is the first building of its kind in the area.

CORE Business Interiors was tasked by Granite Construction and Klassen Corporation to help create a space that not only complemented the design of the building, but would service Granite over the life of this building by providing flexible work environments that can adapt to changing technology and office culture.
