## PROJECT SUMMARY

The repurposing of a nearly 200,000 square foot landmark building that had been vacated by the Federal Government, while providing much needed, accessible expansion space for the Superior Court of Fresno County.

CORE Business Interiors and Haworth worked with the AOC to review every detail of desired use, function and aesthetic of the furnishings specified.

The coordination and logistics of a project of this size took months of planning, meetings and several months of coordinated delivery and installation. CORE provided dedicated project management to ensure a seamless process.

The result is a beautiful court facility that all project participants and the community can be proud of.
