PROJECT SUMMARY

The new, 8500 square foot Veterans Administration Outpatient Clinic in Oakhurst is a full service clinic, providing much needed medical services to veterans in Madera County's foothill communities.

The \$2.5 million clinic houses 18 exam and treatment rooms and provides primary, mental health and eye care, along with women's services and a pharmacy.

CORE Business Interiors provided interior design services and furnishings for this facility and worked closely with the developer, architect and client to deliver this beautiful project. The backdrop of the Sierra provided inspiration for the interiors which you will see reflected in the wood, stone and fabric selections used throughout the interior space.

PROJECT TEAM

Architects: Centerline Design

Contractor: Quiring Corporation

Interior Design: CORE Business Interiors
